

# BUSHWACKER HAND GUARDS

## INSTALLING YOUR BUSHWACKER HAND GUARDS:

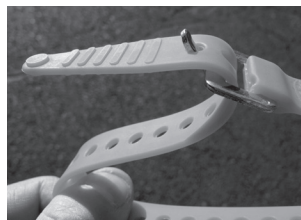

Motorcycle must be equipped with rigid handguards or deflectors to support Bushwackers while riding. Failure to follow recommended mounting and installation instructions voids warranty. Manufacturer is not liable for any damage, injury or death that results from improper use and installation of products. By installing these products, user accepts all liabilities, terms and conditions outlined in the Liability & Warranty statement included here.

## INSTALLING YOUR BUSHWACKER HAND GUARDS™:

- Six different strap slots on each guard provide the perfect fit on almost any motorcycle. Experiment to determine which combination works best for your bike. The Pronghorn Straps fit very tightly in the Bushwacker's strap slots to make a dead-solid connection.
- Simple tension keeps Bushwackers where you want them positioned. After tightening straps, check to ensure all controls, control cables and handlebars operate properly and that hand guards and/or straps do not restrict movement or safe operation of your motorcycle.
- When not needed, stow Bushwackers in your hydration pack or Giant Loop bag.
- Longer straps available to fit a broader spectrum of handle bar/deflector shapes.

**TIP:** When not using Bushwackers, the Pronghorn Straps have a thousand other uses: Lash water bottles, fuel, gear to tail rack. Hold flashlight in place while working in dark. Use your imagination!
